Relationships Respect Dignity

**PROVIDING ASSISTANCE
TO THE UNINSURED AND
UNDERINSURED**

2022 | ANNUAL REPORT

Building a healthy community one person at a time.

LETTER FROM OUR BOARD CHAIR

DR. RICHARD S. SCOTT RN/PHN, MPH, EdD

2022 marked a significant year of growth for River Valley Health Services. We experienced our first full year of offering clinical services to complement our 18-year history of providing personalized nursing care, health screening, and navigational services. The dedication of our Executive Director, nursing, interpreter, and support staff, along with

the generous voluntary contribution of Dr. David Willey's time and medical expertise, enabled us to nearly double the number of new clients served. Furthermore, it enabled us to be more responsive to the breadth of healthcare needs of our clients. The impact of these services is evident in hearing the dozens of stories shared by our clients, often with tears in their eyes, about how grateful they are for the care and compassion they received from our team.

2022 also marked a year of transformation for River Valley Health Services. We underwent a change in Board Leadership with Noreen Kleinfehn-Wald resigning from her role as Board Chair. I was voted in as the new Board Chair, and we added several new members to the Board of Directors. This expanded the diversity, expertise, and life experiences we can now draw upon to guide us into the future to better serve our clients' and our community's unique and often challenging needs.

We look forward to 2023 as we add a clinic location in Scott County and expand upon the services we offer. In addition, we plan to increase our engagement with key leaders and community residents as we cultivate a strong and diverse leadership team through our Board of Directors and Action Committees. This diversity will help us provide the wisdom and infrastructure to enhance our diabetes awareness, screening, and education campaign, along with our robust clinical and nursing care and navigational services.

Please read through the rest of the Annual Report to learn more about our positive impact on our community. I also encourage you to join our team through your engagement, financial support, and/or advocacy to enhance our capacity to not only serve as a critical safety net but to be a champion for the health and wellbeing of all of us.

Sincerely,

Dr. Richard S. Scott, RN/PHN, MPH, EdD
Board Chair, RVHS

"I am very grateful for the service I receive and the love the staff has showed me. I feel very well cared for. Thanks a lot!"
~Esther Villasmil

OUR WORK IS OUR PATIENTS

BILL SWANSTROM Executive Director

One of the compelling traditions of the U.S. military is to honor those who have served. In carrying on this tradition, it is my privilege to acknowledge the services of two River Valley Health Services professionals who have served us so well for many years. Noreen Kleinfehn-Wald, RN, PHN (former Chairperson) and Mary Klehr, RN, PHN. Godspeed and God Bless. Thank you for your service.

We have a small cadre of dedicated part-time employees, volunteers, a core group of board members, and a faithful group of donors and grant providers. A few outstanding individuals can make a big difference. Nurse Heidi and Dr. David Willey touch so many lives in our clinic. Dr. Richard Scott, EdD, our energetic new Chairperson, and Dr. Bruce Wilcox, our creative Medical Director, are revitalizing our board. Glenn Johnston, our intrepid Treasurer, and our interpreters Adriana and Maritza are indispensable to RVHS, and many more help us realize our mission.

All donors are unique, large and small, delivering prayers, equipment, funds and service. The CAP Program has offered RVHS free clinic space in Shakopee; thank you, Board Member Jeff Hansen! The clinic will open in 2023 and be embedded in their food distribution building. We ended the year with a donation of a \$69,000 retinography machine from Open Cities Health Center in St. Paul to help image and refer diabetic eye issues; wow!

Last year, the Lions Clubs in Scott and Carver Counties and grants from Boston Scientific helped us expand our diabetes outreach and clinic work. The Chaska VFW and Charles Venske of Norwood Young America Lions further supported momentum in Carver County into 2023. Shakopee Lions, Eagles, Mayo Clinic, and Wilcox WGH Group (innovators in diabetes) provided the same in Scott County. To top it off, we will be partnering with USDA/VeggieRx through our clinics in piloting a diabetes/pre-diabetes risk reduction program beginning in May 2023.

We have added a volunteer Medical Provider, Victoria Polanco, PA, to allow us to extend our clinic hours alongside David Willey, MD and a Clinic Assistant (Isabelle) to assist all our patients and staff. In addition, under the leadership of our Board Chair, we continue expanding our board, committee, staff, and volunteer membership to reflect the broad communities we serve.

In 2022, we managed to do what we wanted to accomplish and then some. We were challenged right up to the last day of the year. Our work is our patients.

Nothing captures the spirit of River Valley Health Services more than a short vignette about our small Christmas party.

Thursday, December 1st:
Dr. Willey, Victoria Polanco, PA, nurses Heidi and Mary, interpreters/outreach Maritza and Adriana, Glenn, Richard, and I gathered for our Christmas party. We had a call from a tuberculous patient (green card) just as the party started, who had to catch a plane to Mexico the next day and needed a refill of Rifampin and Isoniazid, or he could not get on the plane. For the first half hour of our party, we had six of us on cell phones trying to find a pharmacy with a supply (only one in the 20-mile area) and then get the prescriptions filled. It was an amazing fire drill, and our new PA, Victoria, jumped right in. The food wasn't served until our patient had his prescriptions in hand. As always, great teamwork, all hands-on deck in English and Spanish—everyone pitched in.

RVHS CLIENT STATISTICS

2022 IN REVIEW

NUMBER OF PEOPLE SCREENED AT 2022 OUTREACH EVENTS

2022 WAS A YEAR OF OUTREACH FOR FREE DIABETES AND HEALTH SCREENINGS

- The River Valley Health Services’ 2022 word of the year was “Outreach.”
- We brought more services to more diverse populations in more settings than ever in our history.
- Our staff reached out to small towns in Carver and Scott counties and attended county fairs, church and community center gatherings, and various community outreach events.
- We had eleven screening events and over a dozen presentations on diabetes prevention.
- RVHS worked with volunteers, police departments, vicars, community organizers, senior centers and veterans.

OUTREACH – SOME LESSONS LEARNED

- Diabetes, a #1 health issue, is NOT well understood.
- Partnering with Lions, Eagles, Mayo, Boston Scientific and local sponsors is so important.
- Community testing yielded pre-diabetic and diabetic findings.
- Drawings and gas and gift cards work.
- Unfortunately, printed healthcare materials mostly go unread.
- Diet and exercise is a solid theme for all ages.
- We learned that some equipment melts over 100 degrees and test reagents don’t stay refrigerated over 100 degrees.
- Make testing easy and actionable, including having a nurse write out a script with results and a referral.

NEW AND RENEWED ALLIANCES

- Old friends; St. Francis Hospital, Allina Foundation, Carver County, VFW Chaska, 500+ patients
- Renewing relationships; Scott County Access Group, Scott County Public Health Programs, CAP
- New friends; Mayo Clinic Foundation, various churches, Lions, Eagles, Rotary, USDA/VeggieRx
- Amazing new alliances: CAP Agency offered RVHS free office space for a clinic and Open Cities Health Center (Optometry) donated retinography equipment

2023 WILL HERALD A NEW RVHS CLINIC AT THE CAP AGENCY IN SHAKOPEE

- Expected synergies with food distribution,
- VeggieRx Program,
- Diabetes screening and referral,
- Pre-diabetes coaching and self-management,
- Nurse screening and referrals to the clinic,
- Health assessment and referral.

INCREDIBLE TEAM

- Everyone is a team member of River Valley Health Services: board, staff, donors, volunteers, patients, citizens at screening events, providers, and county and non-profit employees. We are all in this together. River Valley Health Services is a safety net, the resource of last resort for many. So, when the magic happens in the clinic or community, it results from these things coming together on behalf of a relatively small number of patients who really need us. Thank you!

“We are very excited to have River Valley Health Services open their Shakopee Clinic in our CAP Agency Food Distribution Center. This will be a win-win for both our agencies and, most importantly, for our clients and patients.” ~Jeff Hansen, Executive Director, CAP Agency

CLIENT STORIES

(M) went to Ridgeview hospital emergency room in a lot of pain and was diagnosed with kidney stones last fall. She did not have health insurance, so she ended up having a large medical bill that she could not afford. An RVHS nurse helped her apply to the assistance program through Ridgeview Medical financial assistance. After several months her application was approved, and her bill was completely covered—she did not have to pay anything. She was also suffering from depression and HBP. Dr. Willey prescribed medication, and now the patient feels a lot better. She is even motivated to walk every day and is losing weight. She is very grateful for RVHS.

(W) had surgery last year when doctors removed a big tumor in her stomach. She has slowly been recuperating from that. She reached out to RVHS, stating that she was still in pain after nine months and wanted a CT scan done to ensure there was no cancer or anything concerning. She did not have health insurance and could not afford to go back to the surgeon for the one-year follow-up appointment, and she didn't want to wait several months to find out if something was wrong. We scheduled an appointment with Dr. Willey, who made a referral for a CT scan using the Radiology Assist program at the Eagan location. The CT scan was very affordable. An appointment was scheduled a couple of days later and paid for by RVHS. Dr. Willey reviewed the result, and the patient was reassured there was nothing wrong and that it was only scar tissue healing.

Life circumstances changed for a female, under-insured, Hispanic 71-year-old who has had diabetes for 20-plus years, which was under control. She is now unemployed, and her husband lost his job last fall. He got a different job for minimum wage as a custodian but has several health issues that make his job challenging—asthma and COPD, to name a few. They have high medical bills and are trying to pay a small amount—\$20–\$25 a month, on a payment plan for a \$10,000 bill. RVHS has helped with groceries a couple of times. (N) started coming to RVHS in January of this year with her diabetes out

of control: A1C 12.9 and blood sugars ranged from 420–600. She had lost her glucometer and didn't have money to replace it, so RVHS gave her a glucometer, strips, lancets and alcohol wipes to last her for several months. Dr. Willey prescribed different medications until he found the best fit and dosages for her. Between the GoodRx card and her Medicare coverage, she could get her prescriptions for free instead of paying \$1,000 monthly. Dr. Willey has been following (N) closely. In June, she was feeling great, and her blood sugars were 100–130. Now, (N) can eat, not sleep constantly, and move about in their mobile home. She and her husband are so thankful for RVHS and Dr. Willey and his expertise in caring for them.

A former patient of RVHS was referred again to us by a social worker from St. Francis Hospital. (P) wanted to see a doctor because she had had stomach pain for several weeks. We set her up with an appointment to see Dr. Willey, who discovered a mass in her stomach and recommended that she get an appointment with the oncologist at St Francis. A couple of weeks later, (P) received chemotherapy to treat cancer in her stomach.

Parents new to the country within the last three months brought their one-year-old boy to the RVHS Clinic for a child checkup. (J) was born via C-section in Columbia. They had concerns about growth retardation and a misshaped head. Dr. Willey examined the baby and had no concerns with the child's development. He thought maybe (J) had laid on one side more than the other, causing a flat spot on his head. (J) was walking and talking and met age-appropriate milestones. (J's) mom wanted an X-ray for piece-of-mind, but the cost was \$600–\$700. Dr. Willey researched and found "Radiology Assist" and scheduled (J) for a skull X-ray for \$25. The parents were thrilled. Dr. Willey said he would be surprised if the X-ray showed anything but could see that

that extra information was important to the parents.

A 67-year-old woman (B) came to us with chronic abdominal pain, diarrhea, nausea, and weight loss. RVHS had seen (B) 3–4 years ago and had sent her to La Clinica, where she has been a patient. The La Clinica doctor wanted (B) to have a colonoscopy to see what was going on, but the cheapest they could find was \$3,500–\$5,000. (B) has no insurance and low income. The RVHS nurse (B) spoke with recommended making an appointment to see Dr. Willey. Dr. Willey agreed she needed a colonoscopy to see what was going on. Dr. Willey called Bhatti GI in Chaska and spoke with them about a low-cost option or payment plan. They offered to help by doing the procedure for \$750, with an additional \$50 for each biopsy due the day of service. Our client had \$100, and RVHS gave her an additional \$650 to cover the cost. RVHS scheduled an appointment for her, and Bhatti GI squeezed her into their schedule within two days. (B) was so thankful for RVHS and the help she received. Bhatti GI sent the findings to Dr. Willey, and the polyps they removed were precancerous but also appeared to have a partial blockage. Dr. Willey recommended a CT scan of the abdomen and pelvis to get a better view of the obstruction. Dr. Willey ordered the scan at Radiology Assist. (B) was able to pay \$250 for her CT scan. She was so happy she was getting some answers after being miserable for 3–4 years.

The New Beginnings program referred an 18-year-old young mother to RVHS. (E) and her child are living with her parents and siblings; her older sibling has two children. The parents do not speak English. (E) is experiencing difficulty breastfeeding and has other health and familial issues. Her little sister (15) has severe depression. RVHS is working through the medical issues.

CLIENT STORIES

"I am a 54-year-old great-grandmother who is disabled, homeless and has been living in a car. I am very humble and appreciative of the outstanding customer services RVHS and your staff provided these past few weeks. You have gone above and beyond and have been very attentive and helpful. Your team searched for funds, helped coordinate my transportation in Carver County and took time to ensure my health and safety. You made sure I didn't have to sleep in my car in the cold when the temperatures were dangerously below zero.

You connected me to new resources. Your staff, especially Dr. Willey and Heidi, were very knowledgeable and interested in helping me find a way to meet my needs. I want to also thank the VFW for their kind donation to my cause. Because of their efforts and contributions, I was able to stay in a motel for a few days. Heidi is extremely attentive and listens to all my concerns with a great deal of patience. She talked to agencies and other services and ensured that I received the information regarding the mode of payment for the hotel. Dr. Willey tended to my needs as a patient. He made the proper referrals I needed. My medications were refilled, and he made sure I had transportation.

RVHS is very efficient in its services. I was able to get my health plan in order. RVHS provided a resolution exceeding my expectations. I recommend their services to anyone who needs it. I wish there were more places like this." ~Betty

CLIENT STORIES

RVHS Executive Director Bill Swanstrom met with 13 residents of Wayberry (Chaska subsidized housing). Three people needed eye exams and glasses, four needed Rx assistance, and two needed dental work. Most residents were interested in VeggieRx and planned to sign up. Additionally, most planned to visit the RVHS Clinic. Financial stress was pervasive within the group.

(R) had emergency surgery last fall and had to stay at the hospital for several days. With no insurance, he had a large medical bill to pay. RVHS connected (R) with Portico to check if he could qualify for emergency medical assistance but he was denied because more than six months had elapsed after his emergency surgery. With the help of Portico and RVHS, he applied to Allina Partners Care and was finally approved for assistance. All of his medical bills were covered.

(C) had not gone to a doctor for more than ten years. She did not have insurance and did not know where to seek medical care. She was recommended to RVHS by a friend. She needed a physical and got an appointment for her first breast exam and Pap smear. She also saw Dr. Willey for a complete check-up. (C) was worried about diabetes—which ran in her family. Dr. Willey completed a set of blood tests and found she was prediabetic. RVHS scheduled a follow-up appointment and gave her some information about diabetes prevention. She is very grateful for the services she received at RVHS and to know that she can reach out to RVHS for medical care help.

(V), a 62-year-old female Latino, diabetic, works part-time for minimum wage. She is underinsured with a high deductible. (V) came to our booth at River City Days to have her A1C test done, which was elevated. We gave her a flier and encouraged her to visit our clinic the following week. She has needed a glucometer for several years to monitor her blood sugar but could not afford one. She was so thrilled to get a glucometer and supplies at the clinic. (V) also signed up for VeggieRx. (She can pick up her veggies at the clinic on Thursdays.) She had not had an eye appointment for five years as she

couldn't afford one. RVHS made an appointment for her to get a free eye exam and glasses at Target Optical using the OneSight program. (V) plans to return to the clinic to have her A1C repeated every 1–2 months. Her insurance does cover her diabetes medication. (V) left with a big smile and said how blessed she was.

A Scott County Public Health nurse called RVHS to get their client's prenatal vitamins. Their client was a 20-year-old Latino mother who could not afford the vitamins. RVHS supplied the mother with a 4-month supply of prenatal vitamins thanks to Allina Pharmacy.

An interpreter for RVHS was serving a gentleman at a food distribution event at Canterbury. She asked how his day was going. He told her he hadn't felt very good for the past few weeks. She asked what his symptoms were, and he responded: headache, pounding in his ear, feeling of plugged ear, and dizziness. A nurse advised him to go and get his blood pressure checked at CVS with the machine and text the interpreter the results. He sent the text a few hours later. His blood pressure was elevated, 170/101. The interpreter made him an appointment for the next day to see Dr. Willey. Dr. Willey saw (M), prescribed him some blood pressure medicine, and gave him a blood pressure machine and a notebook to monitor his blood pressure at home. (M) followed up with Dr. Willey three weeks later. (M) is a 55-year-old Latino man with no health insurance. He was going to go to the ER but was so worried about the cost that he didn't go. He was so happy that RVHS was able to help him.

(J) is a 45-year-old Caucasian man and Scott County Public Health client without health insurance who needed an antibiotic for an abscessed tooth. Scott County Public Health called RVHS to see if we could have him seen by Dr. Willey for the prescription. The Public Health nurse had found (J) a dental appointment for ten days out

but would only be able to secure the appointment after he was prescribed an antibiotic. Dr. Willey was able to see the man and get him an antibiotic, so Scott County could make the dental appointment for (J), who was in a lot of pain. RVHS also helped (J) with a supply of Tylenol and Motrin from the stock meds at Allina Pharmacy, an example of how RVHS works with other organizations.

(M) came to the clinic with her daughter, who had an appointment to see Dr. Willey. (M) wanted to get medication for her high blood pressure because she did not have insurance and was out of medicine. Dr. Willey was able to prescribe medication for her. Her BP is now under control and (M) comes to the clinic for follow-ups. She is very happy that she does not have to pay anything to get medical care. She recently received a free eye exam and glasses at Target Optical in Chaska using the OneSight program for patients without insurance.

A worried mother contacted RVHS looking for help for her 15-year-old daughter, who is pregnant in her second trimester. A doctor had yet to see her daughter. The whole family had just moved from Mexico. We made appointments for her at Park Nicollet while the county worked on her insurance. Transportation was an issue for them, and they could not get to the RVHS Clinic for a pregnancy test to get the pregnancy verification form needed to apply for insurance through the county. An RVHS nurse and interpreter did a home visit to complete those steps and try to get her medical care as soon as possible. (R) is now under medical supervision, attending school and is expecting a little girl due in June.

A couple from Venezuela attended a new patient walk-in courtesy of the diabetic grant. They have lived in Carver County for one year. The wife (P) has had diabetes for 12–15 years. She had no glucometer or strips but is seen every three months at La Clinica in St. Paul. (P) is 64

CLIENT STORIES

years old, slightly overweight and has good BP. Her blood tests were normal except for elevated blood glucose and A1C. She has a family history of diabetes. One of her family members died because of kidney failure. (P) was given a prescription for a glucometer and strips. We also discussed exercise, diet and medication. We encouraged her to make an appointment with the same physician at La Clinica every three months to feel more connected to her physician. The husband (R) had high blood pressure readings. Among other things, he is overweight and has a shrinking prostate for which he takes medicine. His A1C showed he was in the prediabetic stage. He requested assistance with an eye exam. A vision exam voucher was given to (R), and an appointment was made at Goldsmith EyeCare in Prior Lake. In addition, an appointment was made with Dr. Willey the next day for a complete recheck.

(T), a Latino 26-year-old single female from Carver County who is legally blind, requested financial assistance for a glass eye replacement for her right eye due to retinoblasty (cancer) at age 6. She lives with her mother, who cares for her and works five days a week. Her other eye's retina showed damage years ago. (T) is depressed, she would like to volunteer and get out of the house. She was seen in Hennepin County this winter for depression, loneliness, sleep problems, and loss of appetite and interest. She was prescribed depression and sleep medication which is helping. She has no insurance, is unable to be employed, has no quality of life, and has no talking radio or resources from the Blind Society. She is a vulnerable adult. RVHS is working on securing resources for her but needs more support. The Chaska Lions are also looking for resources for her.

"Heaven sent! I would be dead if it was not for RVHS!" ~Deborah K Hoss

RVHS TEAM

HEIDI

RN, BSN, PHN

I have been an RN for 25 years and have a background working in Labor and Delivery, Postpartum, and Level 11 Nursery. I love working at RVHS because I have a heart and compassion for helping our clients.

MARY

RN

I have been a nurse for over 50 years. I am an advocate for vulnerable children and adults, as well as those who are uninsured and underinsured. I find River Valley Health Services a very rewarding ministry.

MARITZA

*Spanish Interpreter/
Community Outreach*

I've been with Scott, Carver, Dakota CAP Agency and River Valley Health Services for many years. I'm bilingual in both English and Spanish. It is a privilege to support and give back to the community I live in.

ADRIANA

*Spanish Interpreter/
Community Outreach*

I have been a Spanish medical and community interpreter for many years. I love working at RVHS because we help patients find the resources they need when they do not know where to go. I love being able to help people in my community with the language barrier.

DR. DAVID WILLEY, MD

Dr. Willey's practice includes the whole family from newborn to grandparents. His current positions: Physician at Catalyst Medical Clinic, PA, Chaska; Medical Consultant at Carver County Human Services; and Medical Director at SMSC Clinics, Prior Lake, MN. His professional affiliations are the American Academy of Family Physicians (AAFP) and the Minnesota Academy of Family Physicians (MAFP). His Hospital Affiliation is with St. Francis Medical Center, Shakopee, MN.

BILL SWANSTROM

Executive Director

My passion is to use my prior private sector experiences along with my more recent LISW/MPH training on behalf of the clients of River Valley. It's extremely rewarding.

VICTORIA

Physician Assistant

I have worked in primary care, taking care of the Shakopee Latino community for 24 years. Currently, I am working for the Shakopee Mdewakanton Sioux community. I love working at RVHS because I can continue to help the underserved.

ISABELLE

Clinic Assistant

I graduated Summa Cum Laude from the pre-medicine program at the University of Wisconsin-Eau Claire. My experiences as a Hispanic-American help underscore my compassion and aim to bridge healthcare's cultural and social disparities. I am honored to be a part of this organization/team.

Looking
Forward
